

Northeast Green Summit

Northeast Green Summit aims to celebrate the rich and diverse natural and cultural heritage of Northeast India, showcase their inter-linkages and focus on the need for an integrated approach for sustaining this heritage. The Summit is striving towards preserving, maximizing and developing the potential of the unique biodiversity zone of Northeast India through various awareness programmes highlighting, amongst other things, various sustainable livelihood options and associated skills. The discussions will link and draw lessons from science, culture and market mechanisms.

Mission

- To provide a platform for academicians, research scholars, industry leaders, policymakers, student organisations, civil society representatives, media persons, NGOs, etc. to deliberate and design effective solutions for key environmental challenges being faced in Northeast India and in the adjoining region.
- Robust and scientific planning can result in converting these challenges into potential opportunities for supporting sustainable development and ecological conservation in the region.
- This year, our emphasis would be RESETTING EARTH: INCHING TOWARDS NET-ZERO EMISSION REGION in NE India and the entire BIMSTEC region. The Summit, therefore, will dwell on thriving in green and holistic recovery, converting the crisis into an opportunity to advance climate action and get the region's economy on a more sustainable track, besides closing the gap across sectors.

Important Information

For detailed information about participation in expo, exhibition & stall etc, kindly visit our website www.negreensummit.org or mail us at negreensummit@gmail.com

Theme for seminar

■ **Green entrepreneurship for BIMSTEC region:** Green Entrepreneurship ENCOMPASSES those innovative ideas, where entrepreneurial journeys involve delivery of products and services with a positive impact on the environment.

Themes for Workshop

- **Workshop on indigenous tribes-inspired sustainable technologies:** It is basically scouting for those technologies which are originating from tribal lifestyle and which can be scaled up and used in some other context.
- **Greening the Gen Y (Workshop cum competition):** This is basically an awareness program and it will be done on competition mode. Drawing competitions will be arranged on themes around greening.
- **Workshop on Implementing CFR Rights in NE India: Point Counterpoint:** A Learning workshop on Community Forest Rights (CFR) to orient organizations working with/amidst forest-dwellers.
- **Orientation programme on People's Biodiversity Register (PBR):** People's Biodiversity Register (PBR) is designed to document local knowledge with proper validation. An orientation would be provided to various stakeholders by experts on PBR in course of the Summit.

Themes for Exhibition

- **Expo of medicinal plant technologies:** Showcasing of herbal medicine techniques, different analytical tools for herbal sector, allied technologies & innovation, marketing and supplychain solutions for entrepreneurs & stakeholders.
- **Exhibition & sale of traditional foods of NE india & BIMSTEC countries:** For showcasing the traditional foods of north eastern region of India which offer a fantastic indigenous and fermented food source for the ethnic clans of NE region.

Registration

Registration is open for students, scholars, professionals, business houses, govt & non-govt organizations. Please log in to www.negreensummit.org for more details and registration form.
